Bowers School Robotics Club...

Bowers school has a Robotics club that meets every Monday after school! The advisors for the team are Laura Becker, Corinne Colman, and Colleen Litwin. The students design, construct and operate a robot to perform a certain challenge. There is emphasis on using engineering skills to problem solve and work as a team.

The students that participate in this club are; Ben Cherry, Anthony Cortes, Eden Lewis, Christopher Beaulieu, Brandon DeJesus, Adam Karacayli, Sierra Johnson, James Pierog, Emily Scott, Frida Vazquez-Marentes, and Zayed Khalid.

On Saturday January 17th, 2015 the Bowers Robotics team competed in the first VEX-IQ Robotics competition hosted by the Manchester High School. The team competed in a challenge where teams of two maneuvered their robot to push color blocks into a scoring zone and stacked cubes to earn more points. The students worked together to share driving responsibilities, and the Bowers Team placed 4th out of 8 elementary through middle school teams. Emily Scott (pictured here) also received recognition for participation in the Robotics Club from Board Chair Mr. Chris Pattacini and Superintendent Geary at the recent Board of Education meeting held at Bowers.

Way to go Robotics Team!!
